MonoMusic

M+ 1m

MonoMusic is based on the M+ 1m font and I use M+ 1c Heavy for titles. Get them all free here.
I picked M+ since the license allowed me to modify it and it's a narrow font that's still very readable.

Software

You need to use a word editor that supports opentype superscripts to get the full benifits or you can always use the web version and print/save pdf directly from there.
I will add hardcoded superscripts to the webversion so you can copy to e.g. MS Word in the future.

Correct signs

Just type
#! → ♯   ##! → 𝄪   #? → ♮
b! → ♭   bb! → 𝄫   A! → Δ
o! → ø

Add and sus

Gets compressed
sus4 → sus4   add9 → add9

Superscripts

All chord "extras" can be superscripted using open-type superscript*
Cm^7/E$^♭$ A$^{♭Δ7}$/G   C^ø F^o
E$^{♭sus4}$ D$^{+Δ7}$

*note that it's not the same as e.g. MS Word x^2 that also breaks monospacing

Repositioned /

The forward slash often looks out of place in other monospaced fonts in chords
C^7/E → C^7/E
F^{add9}/G → F^{add9}/G

MonoMusicFixer

The online MonoMusicFixer does everything this font can and then some by auto:
· converting long chord extras such as e.g. dim and maj to ^{o} and ^{Δ}
· converting # and b to ♯ and ♭
· superscripting and lowering the chords
· highligthing the chords with color options
